Please thoroughly read the details for LMP1001 for the 2019-20 academic year

1. All of the graduate students have been placed into one of five general groups based on either
   i) their stated preferences or ii) the preference of their supervisors. The 5 groups based on
   general themes are as follows:

   Group 1. Brain and Neuroscience
   Group 2. Cancer, Development and Aging
   Group 3. Cardiovascular, Physiology and Metabolism
   Group 4. Infectious Diseases, Inflammation and Immunology
   Group 5. Molecular and Cell Biology and Regenerative Medicine

2. Given the projected number of students, we will have 6 weeks of seminars in the Fall
   Term and 6 weeks of seminars in the Winter Term (12 weeks total). The Cardio group
   has 6 weeks, MCB has 4 weeks, Cancer has 4 weeks, Neuro has 5 weeks and ID has 5
   weeks over the full year.

3. Each student is required to attend a total of 5 weeks of student seminars.

4. Your attendance should include all the seminars in your group (the exception is Cardio
   where you need attend only 5 of the 6 weeks). For groups that have less than 5 weeks,
   you must make up the additional weeks by attending seminars from another group. So,
   for MCB, that means attending two additional weeks in other groups and for Cancer,
   one additional week in another group.

5. Each week, two of these five groups will hold seminars at the same time in different
   rooms. Typically, two students in each group will present in each sessions.

6. The sessions will rotate between the five groups in a regular pattern. The specific
   schedule for these is outlined on the next page.

7. You are, of course, encouraged to attend additional seminars of interest.

8. This is a pass/fail course. 100% attendance for student seminars (5 weeks for the 2019-
   20 academic year) will, therefore, be required to receive a grade of “Pass”.

9. Each seminar will be moderated by 2 faculty. These professors will provide
   feedback/evaluation of both presentations at the end of each session.

10. It is expected that the PIs/supervisors will also be present when their student is
    presenting. Other Faculty are, of course, strongly encouraged to attend regularly.

11. Use of electronics (including laptops, tablets or cells phones) will not be permitted during
    seminars.

12. Attendance for faculty and student seminars is required for MSc students in their first two
    years of study and for PhD students in their first 4 years of study. Students beyond this
    timeframe are not required to attend seminars.

13. Students must have the title and abstract (~250 words) for their seminar submitted to
    lmp.grad@utoronto.ca by Monday at 10:00 a.m. the week before their presentation.

14. Students are required to attend 50% of the faculty seminars during the fall term and 50%
    of the seminars during the spring term.
